Art Unit: 1712

Claims 1-14 are generic to a plurality of disclosed patentably distinct species comprising:

1) Resins (A) selected from:

a) Polyols (A1) such as the polyester polyol or Preparation Example 2 on page 30 derived from polybutadienedicarboxylic acid PB-C1000 and 2-butyne-1,4-diol

b) Modified polyols (A2) wherein the modifying reactant is identified.

c) Both (A1) and (A2) wherein the modifying reaction of (A2) is identified.

2) Resins (B) having a sulfonium and propargyl group such as cresol novolak epoxy resin of Preparation Example 1 on page 30 reacted with propargyl alcohol, linseed oil and 1-(2-hydroxyethylthio)-2-propanol.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of both Resins (A) and Resins (B) even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1712

A telephone call was made to Joseph J. Ruch on August 4, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. The reply to this requirement to be complete must include an election of the species to be examined even though the requirement be traversed (37 CFR 1.143).

Upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
